

Dear Hiring Manager,

I am writing to apply for the Software Developer role at Capgemini. As a recent BTech graduate in AI & Data Science with strong skills in Java, Python, and SQL, I am eager to contribute my expertise to your team.

During my academic journey, I developed a Banking Management System in Java (OOPs) and a stock price prediction model combining ARIMA and LSTM, which enhanced my problem-solving and coding skills. I also led a real-time ASL recognition project using Python and OpenCV, strengthening my teamwork and leadership abilities.

Thank you for your time and consideration.

Sincerely,  
Sai Ashwin Kumaar S
